

GRAB BARS

SAFETY WITH ELEGANCE

The grab bars are designed for modern restroom environments where safety, accessibility, and aesthetics go hand in hand. Their rounded shapes and ergonomic design provide a comfortable and secure experience, while the handles integrate seamlessly and discreetly into the overall design.

The grab bars are robust and reliable, built to support balance and stability — ideal for public and commercial restrooms where functionality is essential.

As elegant as they are strong, the handles come in four sizes and are available in stainless steel, matte black, white, or any classic RAL color. They can be tailored to any environment without drawing unnecessary attention.

The grab bars are designed to complement the entire DAN DRYER range — from the modern designs of BJÖRK, to the innovative solutions in LOKI, the functional fittings in TAPS, and the classic products in STAINLESS DESIGN.

The result is a complete solution that combines safety, comfort, and aesthetics, enhancing both the user experience and the overall impression of the restroom facilities.

There are places where
people stay for a moment.
And where the design must
perform every single second
